THE FEAR OF MISSING OUT (FOMO) ON THE LATEST TECHNOLOGIES

Marina B. Walsh, CMB, Vice President, Industry Analysis, Research and Economics (Invited)

The reality is that lenders need to spend less time worrying about missing out on new technology and concentrate more on giving technology context through process and adoption. COVID-RELATED EFFECTS ON YOUR LOAN PORTFOLIOS: UNCERTAIN RISKS & GROWTH CHALLENGES AHEAD

David Ruffin

QuickRate

Irrespective of current stellar credit quality metrics, it would be a fool's errand to be lulled into a sense of complacency given the uncertainties of embedded credit risk (largely driven by government largess and temporary regulatory relief). Additionally, our industry is dealing with negative organic loan growth. The post COVID era will present challenges on both ends of the lending spectrum: ferreting out residual pandemic credit risk, and seizing lending opportunities to grow our loans. In this session, we'll speak to both sets of challenges—and their respective opportunities.
